

En-Soil Algae Pricing

Nourish soil in a sustainable way with **En-Soil Algae** soil amendment and say goodbye to expensive synthetic fertilizers that deplete the soil and cause harmful runoff into ponds, lakes, and ground water.

Made from living *Chlorella vulgaris*, purity of culture is ensured by our proprietary algae nutrients and growing technology. These micro-algae **supercharge** the bacteria found in the soil's natural biome, promoting nitrogen fixation and increasing bio-availability of phosphorus. Soil respiration and structure are improved, as are root growth and intensity of green color in plants. Improves tolerance to abiotic stress, such as drought and salt.

Just 1 tsp (5 ml) will cover 1000 sq. ft. (93 sq. meters) once mixed with 1 gallon (4 liters) of water, making **En-Soil Algae** an exceptionally cost-effective way to promote the health of farmland, pastureland, sod, putting greens, lawns, and gardens.

- Pure, Concentrated Algae from Living Culture
- Enhances Soil Structure, Promotes Root & Foliar Health, Increases Resistance to Abiotic Stress
- Eliminates Harmful Runoff & Does Not Contribute to Red Tide or Other Harmful Blooms
- Cost-effective; On Average 40% cheaper than Synthetic Fertility Inputs

Commercial growers/farmers, golf courses, and municipalities, may want to purchase volume. One-gallon jugs and 5-gallon jerrycans are available. Volume discounts are available for sales distributors. Contact our Sales Director, Tucker Garrigan at 843-532-3875.

Have particularly difficult soil/growing situation? We want to work with you to create a personal En-Soil Rx! Reach out to Merideth Garrigan with our Partner Development Team at 843-532-4031.

125mL En-Soil for Indoor Growing \$25.95

The 125 mL bottle is for indoor growing. It comes with a dropper top. Just a couple of drops in a 1/2 gallon watering can is all that is needed to treat houseplants.

1-Liter En-Soil \$129.95

The 1-liter bottle is our most popular size for large-scale soil treatment; it's ideal for neighborhood parks, community gardens, college campuses, golf courses, and homes with acreage. A single 1-liter bottle will cover 5 acres for a single treatment.

250 mL En-Soil \$39.95

The 250 mL bottle is the choice of vertical growers and patio gardeners. Great for small yards; keep your potted plants' soil lush for nurturing balcony tomatoes and healthy micro-greens. One 250 mL bottle will cover 1.25 acres for a single treatment.

4-Liter (1 Gallon) En-Soil \$499.95

The 4-Liter (1 gallon) jug is ideal for commercial usage. Landscapers, sod farmers, and greenskeepers that purchase in volume may be eligible for discounted volume pricing. Talk to our sales team about becoming an En-Soil distributor: 843-532-3875. One 4-Liter jug will cover 20 acres for a single treatment.

500 mL En-Soil \$69.95

The 500 mL bottle is ideal for home use. Rejuvenate the soil at your home, small business, or church. Works well for home vegetable gardens. One 500 mL bottle will cover 2.5 acres for a single treatment.

5 Gallon En-Soil for Agriculture \$2399.95

The 5-Gallon jerrycan is intended for large-scale agriculture, pastureland, and landscaping. Talk to our sales team about becoming an En-Soil distributor for discounted volume pricing: 843-532-3875. One 5-Gallon jerrycan will cover 100 acres for a single treatment.
